PROFILE SUMMARY

Senior Full Stack & DevOps Engineer with 3+ years of hands-on development experience and 1+ year of professional experience in product-based and service-based companies. Specialized in the MERN stack, Next.js, Bun.js, and both SQL and NoSQL databases, with strong expertise in microservices architecture. Successfully delivered 20+ production websites and web applications, including ERP systems, trading platforms, and MT5 Manager-integrated systems. Proven ability to handle end-to-end development independently, covering frontend, backend, cloud infrastructure, and DevOps. Experienced in Docker, Kubernetes, Kafka, CI/CD pipelines, and cloud deployments, with exposure to Web3 and blockchain integrations, bridging traditional enterprise systems with decentralized technologies.

SKILLS

Programming Languages: JavaScript, TypeScript, Python

Front-End Development: React.js, Next.js, Tanstack-Start, Redux, EJS, Tailwind CSS, Bootstrap, jQuery, AJAX, HTML, CSS, Sass, Framer Motion, GSAP, AOS, Lenis, React-Flow

Back-End Development: Node.js, Bun.js, Fast-API, Express.js, Next.js (backend), Microservices, Clean Architecture, Repository Pattern,

Data Structures & Algorithms: Data Structures: Arrays, Objects, Linked Lists, Stacks, Queues, Trees, Graphs, Hash Tables, Heaps
Algorithms: Bubble Sort, Selection Sort, Insertion Sort, Quick Sort, Merge Sort, Binary Search, Linear Search, DFS, BFS

Databases: MongoDB, PostgreSQL, Firebase, Cloudinary, Prisma ORM, Neon DB, S3

DevOps & Deployment: Docker, Kubernetes (K8s), NGINX, PM2, AWS (EC2), Microservice Architecture, Module Federation

Architectural Patterns: MVC, Microservices, Micro-Frontend, Clean Architecture, Repository Pattern, Trpc

Testing & API Tools: Postman, API Testing, Zod and Yup, Thunder Client

Version Control : Git, GitHub

Tools & Frameworks : VS Code, Cursor Figma, Framer, Electron.js, Material UI, ShadCn Ui, Hero Ui, JSON, OpenAI API, React Query, Kafka, Rabbit Mq, Socket Io, React Hook Form, Privy

Soft Skills : Problem Solving, Decision Making, Leadership, Teamwork, Adaptability

WORK EXPERIENCE

Senior Full Stack & DevOps Engineer | Web3, Blockchain & DApp Development

June 2025 – Present

Delta International Institution (UAE – Remote)

- Working remotely with a UAE-based organization, delivering enterprise-grade web platforms and applications from India.
- Leading end-to-end full stack development single-handedly across frontend, backend, cloud, and DevOps.
- Successfully designed, developed, and deployed 20+ production websites and web applications.
- Architected and managed cloud infrastructure including AWS deployments, domain management, SSL, monitoring, and scaling.
- Implemented DevOps pipelines using Docker, CI/CD workflows, NGINX, PM2, and cloud automation for high availability.
- Developed scalable backend services using Node.js, Express, Next.js (backend), FastAPI, and microservices architecture.
- Built modern frontend applications using React, Next.js, Tailwind CSS, and advanced state management.
- Worked on MT5 Manager-linked trading systems, integrating platform data, user management, and real-time workflows.
- Delivered Web3 & Blockchain-integrated solutions, bridging traditional web systems with decentralized technologies.
- Owned system architecture, database design, API development, deployment, and production maintenance.

Full Stack & DevOps Engineer

January 2025 – June 2025

Luvud Technologies (Service-Based Company)

- Worked in a service-based environment, delivering custom web solutions for multiple clients across different domains.
- Independently designed, developed, and deployed 10+ ERP products, handling both frontend and backend development.
- Built scalable business modules including inventory, billing, user management, reporting, and role-based access systems.
- Managed web hosting and server infrastructure, including deployment, domain configuration, SSL setup, and production monitoring.
- Implemented RESTful APIs and optimized database schemas for performance and scalability.
- Collaborated directly with clients to gather requirements and deliver production-ready solutions within tight timelines.
- Ensured code quality, security best practices, and long-term maintainability across all projects.

Freelance Full Stack & Web Developer

2023 – Present

Self-Employed

- Delivered 5+ static websites and client-focused web solutions with responsive design, SEO optimization, and modern UI frameworks.
- Managed end-to-end freelance projects, including development, hosting, domain setup, SSL configuration, deployment, and ongoing support.

Personal Projects:

Live Video Recording And Video Sharing Application

[GitHub](#)

- Technologies: **Electron, AWS** (S3 Bucket, CloudFront), **Next.js, TypeScript, Prisma, Socket.IO, React Query, ClerkAuth, NeonDB, React, Redux, Stripe**
- Developed a cross-platform application (web and desktop) for live video recording, screen recording, and video sharing using **Electron** and **Next.js**.
- Integrated **AWS S3 Buckets** for secure and scalable video storage and retrieval.
- Implemented user authentication with **ClerkAuth** and managed subscription plans using **Stripe** for premium features.
- Built features for workspace and folder management to organize video recordings efficiently.

Ecommerce Website

[GitHub](#)

- Technologies: **Node.js, Express.js, MongoDB, Razorpay, AWS**
- Designed and implemented a fully functional E-commerce platform with features for product purchasing, user wallet management, returns, cancellations, refunds, and coupon offers.
- Developed an **admin panel** for managing sales, orders, and user information, with built-in tools for monitoring and analyzing sales data.
- Integrated **Razorpay** for seamless and secure payment processing.
- Deployed the application on **AWS**, ensuring high availability and scalability.
- Leveraged **MongoDB** to efficiently manage user, product, and transaction data.

Job Portal (microservice)

[Figma](#) [GitHub](#)

- Technologies: **Bun.js, Express.js, MongoDB, Next Js, S3, React query, Zod, microservices architecture**
- Job Posting & Applications: Recruiters can post jobs, and applicants can apply directly through the portal.
- Online Meetings & Recording: Integrated real-time interview features with video meetings and session recording support.
- Data Storage: Utilizes MongoDB for structured data management and AWS S3 for secure media and resume storage.
- Deployed the application on **AWS**, ensuring high availability and scalability.
- Role-Based System: Separate dashboards and workflows for recruiters and job seekers, enhancing user experience and security.

Mini Projects:

- TASK-MANGEMENT APPLICATION
- TO-DO-LIST
- WEATHER APP
- NETFLIX CLONE
- Chat App
- Micro Service E-Commerce
